Hi,

Our startup is planning to purchase 5–6 high-performance laptops for design and gaming-related testing. We are considering Alienware X16 and Alienware m18. Could you help us with:

A comparison of these two models (performance, portability, cooling).

Enterprise or bulk pricing options.

Support packages for businesses.

We are located in Hyderabad, so delivery timelines and after-sales support availability here would also be important.

Looking forward to your response,

Prabha Sharma
